

Table of Contents

Preface	1
<hr/>	
Chapter 1: Prototyping jQuery Mobile	9
<hr/>	
The game has changed	9
The mobile usage pattern	10
HTML prototyping versus drawing	11
Getting our hands dirty with small business	12
The rest of the site	15
Requirements	18
Alternates to paper prototyping	19
Summary	19
Chapter 2: A Mom-and-Pop Mobile Website	21
<hr/>	
A new jQuery Mobile boilerplate	21
Meta viewport differences	23
Full-site links beyond the industry standard	24
The global JavaScript	26
.live versus .on	27
The global CSS	28
Breaking the HTML into a server side template	28
What we need to create our site	31
Getting Glyphish and defining custom icons	32
Linking to phones, e-mails, and maps	34
Custom fonts	37
Page curl shadow effects for our list items	38
Optimization: why you should be thinking of it first	39
The final product	41
The custom CSS	42
The resulting first page	47

Getting the user to our mobile site	48
Detecting and redirecting using JavaScript	49
Detecting on the server	51
Summary	51
Chapter 3: Analytics, long forms, and frontend validation	53
Google Static Maps	53
Adding Google Analytics	55
Long and multi-page forms	60
Integrating jQuery Validate	62
E-commerce tracking with Google Analytics	72
Summary	74
Chapter 4: QR Codes, Geolocation, Google Maps API, and HTML5 Video	75
QR codes	76
Geolocation	77
Integrating the Google Maps API	87
Geek-out moment—GPS monitoring	92
Linking and embedding video	98
Summary	100
Chapter 5: Client-side Templating, JSON APIs, and HTML5 Web Storage	101
Client-side templating	102
Patching into JSON APIs (Twitter)	104
Programmatically changing pages	113
Generated pages and DOM weight management	113
Leveraging RSS feeds	114
Forcing responsive images	119
HTML5 Web Storage	119
Browser-based databases (a work in progress)	120
JSON to the rescue	120
Leveraging the Google Feeds API	122
Summary	124
Chapter 6: HTML5 Audio	125
HTML5 Audio	126
Fixed position persistent toolbars (really!?)	128
Controlling HTML5 Audio with JavaScript	130
HTML5 Audio in iOS is different	136
The all-in-one solution (multipage made useful)	136
Saving to the home screen with HTML5 manifest	150
Summary	152

Chapter 7: Fully Responsive Photography	153
Creating a basic gallery using PhotoSwipe	154
Supporting the full range of device sizes – responsive web design	156
Text readability and responsive design	161
Smartphone-sized devices	164
Tablet-sized devices	165
Desktop-sized devices	166
Cycling background images	166
Another responsive approach – RESS	169
The final code	170
Summary	170
Chapter 8: Integrating jQuery Mobile into Existing Sites	171
Detecting mobile – server-side, client-side, and the combination of the two	171
Browser sniffing versus feature detection	172
WURFL – server-side database-driven browser sniffing	172
JavaScript-based browser sniffing	177
JavaScript-based feature detection using Modernizr	178
JavaScript-based lean feature detection	179
Server-side plus client-side detection	179
Mobilizing full-site pages – the hard way	183
Know your role	183
Step 1 of 2 – focus on content, marketing cries foul!	184
Step 2 of 2 – choose global navigation style and insert	185
Global nav as a separate page	185
Global nav at the bottom	186
Global nav as a panel	187
The hard way – final thoughts	187
Mobilizing full-site pages – the easy way	187
Summary	194
Chapter 9: Content Management Systems and jQM	195
The current CMS landscape	196
WordPress and jQuery Mobile	196
Manually installing the mobile theme switcher	198
Automatically installing the mobile theme switcher	198
Configuring the mobile theme switcher	199
Drupal and jQuery Mobile	200
Updating your WordPress and Drupal templates	205
WordPress – Golden Apples jQM Theme	205
Drupal – jQuery Mobile Theme	205

Adobe Experience Manager	206
Summary	208
Chapter 10: Putting It All Together – Flood.FM	209
A Taste of Balsamiq	210
Organizing your code	212
MVC, MVVM, MV*	212
MV* and jQuery Mobile	213
The application	214
The events	215
The model	216
Introduction to the Web Audio API	217
Prompting the user to install your app	220
New device-level hardware access	222
Accelerometers	222
Camera	222
APIs on the horizon	223
To app or not to app, that is the question	223
Raining on the parade (take this seriously)	223
Three good reasons for compiling an app	225
The project itself IS the product	225
Access to native-only hardware capabilities	225
Push notifications	225
Supporting current customers	225
PhoneGap versus Apache Cordova	226
Summary	229
Index	231
